SureMDM®

42GEARS®

SureMDM for Education

Secure Devices. Create Better Learning Experiences.

Digital learning now extends beyond student tablets and laptops. Schools, universities, coaching institutes, and education technology providers manage Chromebooks, iPads, Windows devices, interactive flat panel displays, shared devices, and specialized learning technology across classrooms, labs, campuses, and remote environments.

42Gears SureMDM helps education IT teams centrally **deploy, secure, manage, monitor, automate,** and **support** these devices—creating focused learning environments while reducing the operational burden on IT.

The Challenges of Digital Education

Keep Students Focused

Unrestricted access to apps, websites, games, and social media can turn learning devices into distractions.

Manage Devices at Scale

IT teams need to deploy and manage hundreds or thousands of devices across classrooms, labs, campuses, and remote learning environments.

Protect Learning Content

Digital textbooks, courseware, assessments, and proprietary educational content need protection from unauthorized access, copying, or modification.

Manage Diverse Endpoints

Modern institutions use Android tablets, Chromebooks, iPads, Windows PCs, interactive displays, shared devices, and emerging learning technologies.

Secure Shared Devices

Devices used across classrooms, libraries, labs, and administrative environments may be shared by multiple students, faculty members, and staff.

Reduce IT Workload

Provisioning, application deployment, updates, troubleshooting, and routine device maintenance can consume significant IT resources.

Minimize Learning Disruptions

When a device stops working, classroom activities can be affected. IT teams need visibility and remote support to resolve issues quickly.

The 42Gears Solution

One Platform for Secure, Connected Learning

SureMDM gives education IT teams centralized control over their device fleet—from enrollment and configuration to security, application management, monitoring, automation, and remote support.

Create Distraction-Free Learning Environments for Students & Staff

Transform general-purpose devices into focused learning tools.

- Lock devices to approved educational applications
- Restrict unauthorized apps and websites
- Control device settings and peripherals
- Create classroom- and course-specific configurations
- Build dedicated profiles for examinations and assessments

Result: Students and teachers get a focused digital environment while IT maintains centralized control.

Protect Learning Content & Resources

Keep educational applications and content under control across managed devices.

- Control application access
- Restrict unauthorized device functionality
- Apply security policies remotely
- Manage access to approved learning resources
- Standardize configurations across device groups
- Secure access to school resources with Zero-Trust Network Access

- Monitor mobile threats with real-time scanning and data-driven MTD policies
- Automated Patch and OS update management with dedicated dashboards
- Locate lost devices both indoors and outdoors

Result: Educational content remains protected while students receive a consistent learning experience.

Deploy & Manage Devices at Scale

Simplify the complete device lifecycle across campuses and remote environments.

- Enroll devices in bulk
- Use Zero-Touch Enrollment where supported
- Apply configurations and policies remotely
- Deploy and update learning applications
- Deliver large files faster while using less bandwidth with SureMDM Mesh Delivery
- Manage devices by user, group, classroom, or location
- Enroll BYOD Android and Apple devices

Result: Faster provisioning with less manual IT intervention.

Monitor & Troubleshoot Remotely

Give IT teams the visibility and tools to resolve issues without physically accessing every device.

- Monitor device health and status
- Receive alerts for important events
- Remotely troubleshoot supported devices
- Push configurations and fixes over the air
- Restart and maintain devices remotely
- Two-way voice calling and remote screen recording

Result: Reduce downtime and minimize disruption to teaching and learning.

Transform Digital Learning with 42Gears

From student tablets and Chromebooks to interactive classrooms, shared devices, and emerging learning technologies, **42Gears SureMDM helps education organizations securely manage the technology that powers modern learning.**

Secure Devices. Focus Learning. Simplify IT.
