

Datalogic-42Gears

A Collaboration that Strengthens Device Management

42Gears is a leading name in the enterprise mobility landscape with innovative mobile device management solutions that can be customized to suit specific business needs. With 42Gears' UEM solution, SureMDM, organizations can monitor their mobile devices and peripherals located across geographies while being able to **prevent device and data misuse, enhance device, data, and network security, track device location, push content and apps, and improve employee productivity.**

Exploring the 42Gears-Datalogic Partnership

42Gears' UEM solution comes integrated in Datalogic products, which makes them easily manageable. The technical excellence of Datalogic's devices combined with SureMDM's ground-breaking mobile device management capability makes Datalogic's products an ideal choice for organizations that are looking to make the most of enterprise mobility.

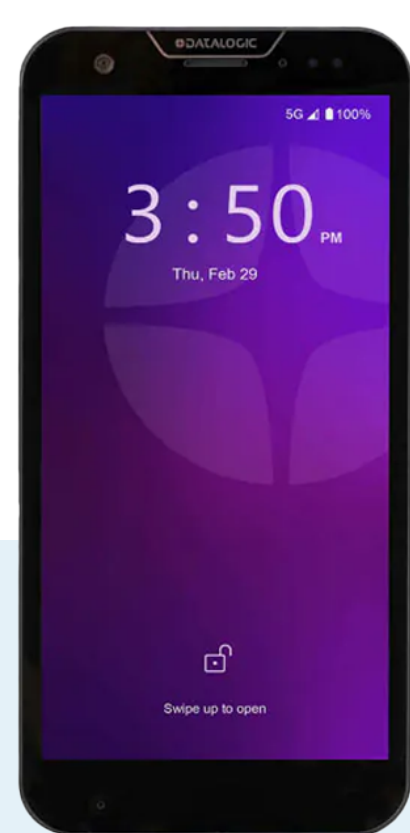

Rugged Device Management

With SureMDM web console, businesses can secure and monitor Datalogic's rugged handheld devices. 42Gears kiosk lockdown solution, SureLock, allows businesses to lock down rugged devices into dedicated purpose devices. Datalogic's devices comes pre-installed with SureLock. SureLock can be configured on corporate devices through DXU, cloud or SureMDM.

SureMDM supports the following DataLogic Mobile Computers:

Memor 30/30X

Memor 35/35X

Memor 11

Memor 20

Memor 10

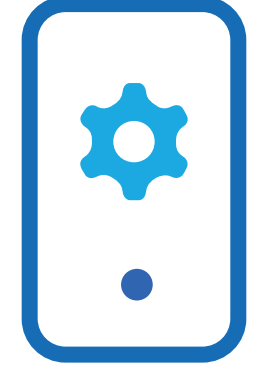

Skorpio X5

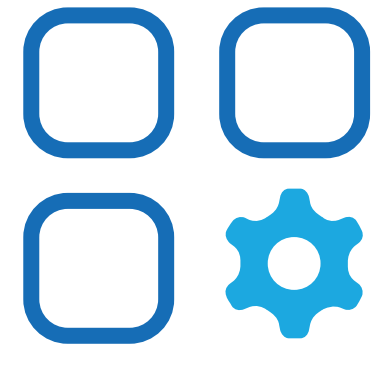

Joya Touch 22

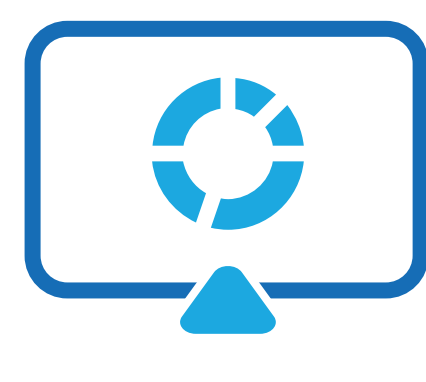

42Gears' UEM solution offers:

Easy Device
Deployment

App & Content
Deployment

24/7
Monitoring

Remote Diagnostics &
Troubleshooting

Security &
Notifications

Things Management

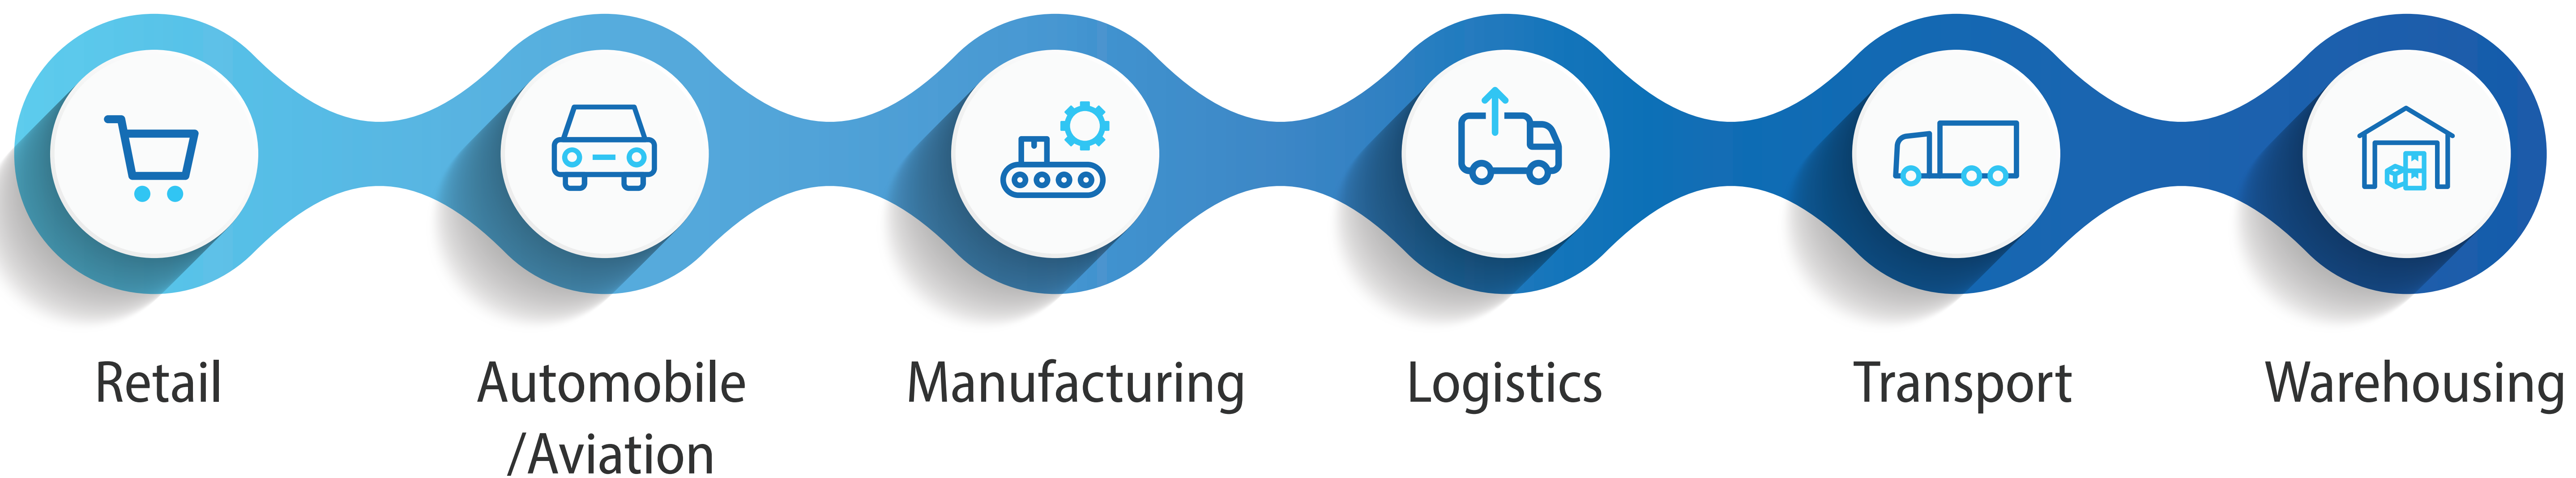

42Gears' Things Management framework supports the management of connected devices and peripherals, including the **Smart Battery, Printers, Handheld Scanners, Fixed Scanners, Cradles/Docks etc.**

Device, Application & Data Security

With 42Gears' UEM solution, businesses can lock down devices into kiosk mode and prevent users from altering system settings. Password policies to access specific apps can be set to prevent employees from using apps that are not related to their work. Individual child windows can be blocked or allowed based on requirements.
