Benefits of Managing Zebra Devices with SureMDM

Why SureMDM should be used with Zebra's VisibilityIQ Foresight

Zebra VisibilityIQ Foresight (VIQ) is a cloud-based solution that provides operational insights into device health, utilization and inventories, and actionable predictive analytics to prevent issues and empower data-driven decisions. SureMDM enhances Zebra VIQ capabilities by:

- ▶ Providing insight into device and application usage, device inventory, utilization, location, and performance.
- ▶ Maximizing device uptime and worker productivity by ensuring good device health
- ▶ Identifying and troubleshooting problematic applications that often crash and devices that regularly reboot
- ▶ Forecasting the number of devices required to increase business performance
