

# 42Gears Things Management Solution

## About 42Gears

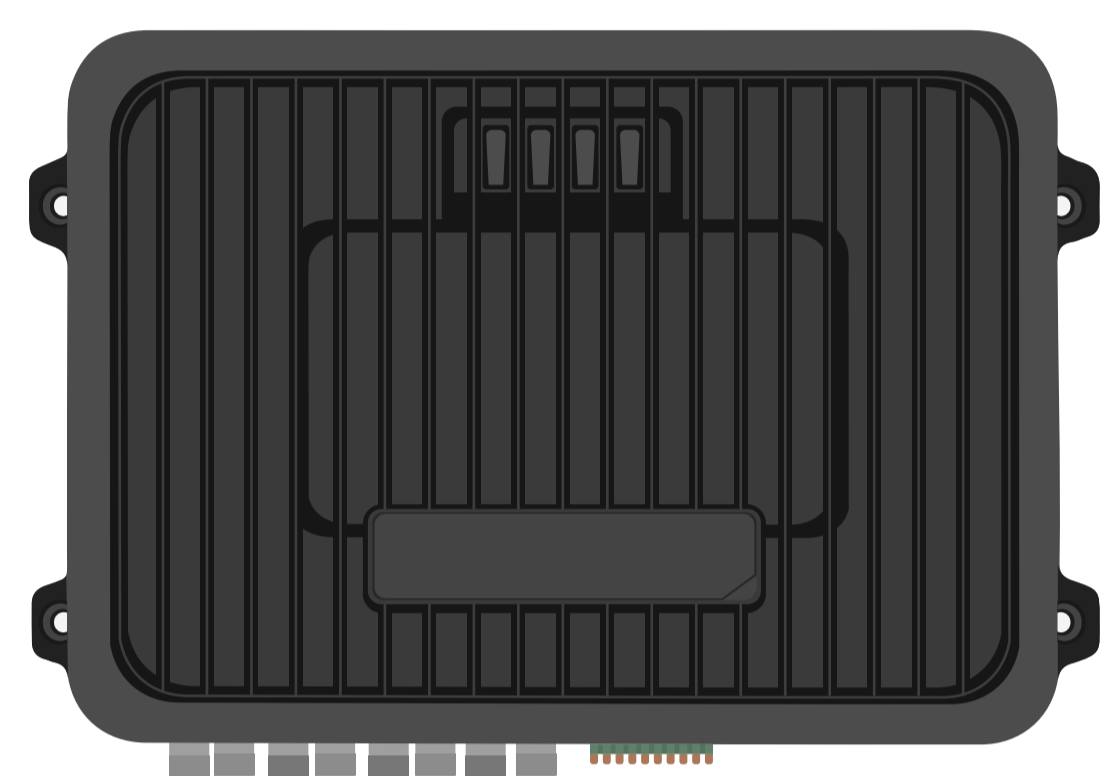

42Gears is a leading Gartner and IDC recognised Unified Endpoint Management (UEM) solution provider. Our diverse range of management solutions include UEM, Things, VR, and Wearable Management, Private Device Farm, Contact Management, Intelligent Camera Blocking, and Mobile Threat Defense. With over 23,000 customers in 170 countries, 42Gears solutions have a proven track record of success in any industry.

Streamline the provisioning, control, and monitoring of IoT devices, accessories, and peripherals with 42Gears Things Management Technology (TMT). The TMT framework allows businesses to manage connected peripherals and accessories called 'things' through a central console. Create a bridge between your peripheral and IoT Gateway using 42Gears' Things Connector or Cloud Connector.

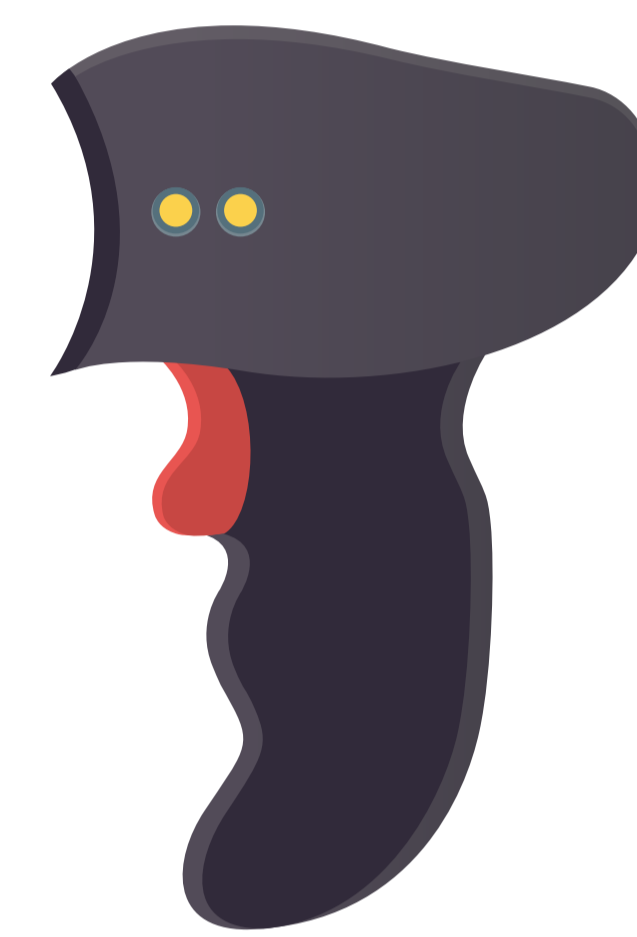

## Types of devices that can be managed using 42Gears Things Management Technology include (but are not limited to):

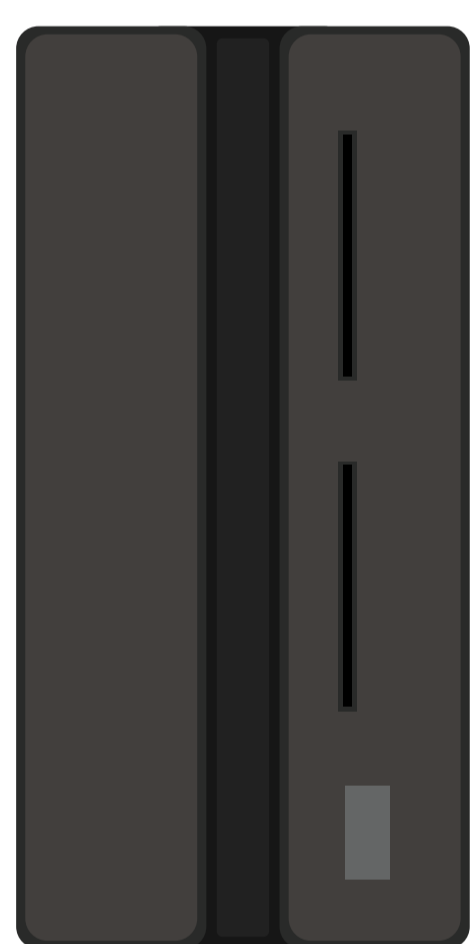

Printer

RFID readers

Barcode Scanners

Card Readers

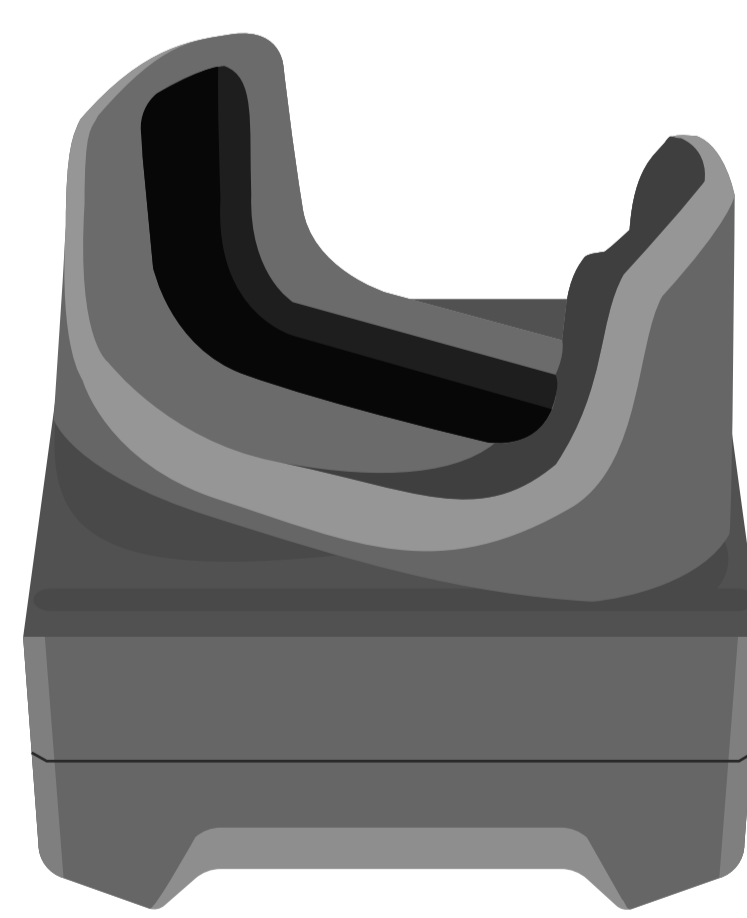

Cold storage  
trackers

Smart Battery

GPS Tracker

Charging Docks

Bluetooth Headset

## Key Features:

### Alerts and notifications

Send real-time alerts and notifications about device status and performance.

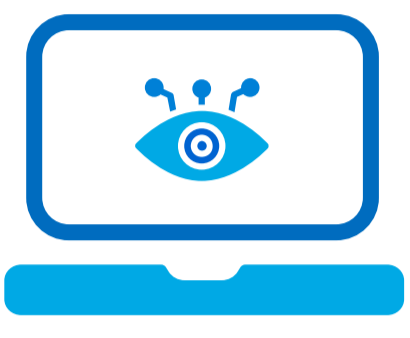

### Simple 'Things' Enrollment

Easily enroll your 'Things' in SureMDM with just a few clicks.

### Firmware Updates

Remotely dispatch firmware updates to all supported devices.

### Thing Stats Monitoring

Remotely monitor device information to ensure optimal performance.

### Location-based Monitoring

Create a virtual fence around a geographical location and track devices as they move in or out of the fence.

## OEM Support for Things Management

42Gears also works with OEMs to develop support for devices classified as 'peripherals and accessories' using Things Management Technology. This serves as a one-step solution for the OEMs to completely manage their IoT devices, peripherals, and accessories.

## Why choose 42Gears' Things Management Solution?

### Simplified Asset Tracking

Enrolled 'Things' are visible on the SureMDM Web Console, just like any other endpoint to enable effective remote management.

### Effective Remote Device Management

Empowers IT teams to centrally view and manage connected peripherals/accessories.

### Compatible with a diverse range of products

The 42Gears TMT framework supports peripherals with both host machines as well as in-built operating systems.

### Cost-effective

Reduces costs by helping organizations be proactive about hardware maintenance.

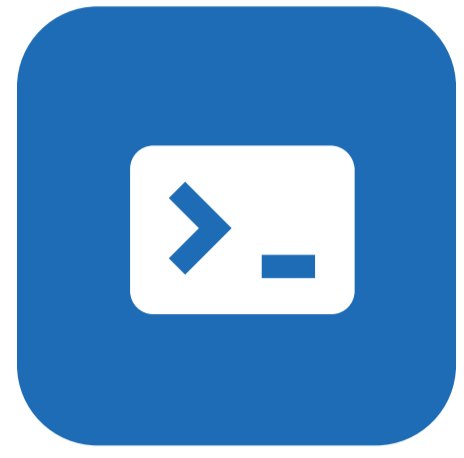

### Ensured Security

42Gears TMT adds an extra layer of security to all connected peripherals with the IoT gateway to ensure that only authorized people can access your data.

### Improve Maintenance and Device Efficiency

Proactively identify and address potential issues before they occur with remote monitoring.

### Customization for Developers

With the 42Gears developer portal, developers have the ability to create their own 'Things Connector' for their devices.

### Real-time Support

24/7 real-time technical support via call/chat/email/ticket.
